

Fever is a symptom with an underlying cause that may be significant. Most often, fevers are caused by viral infections. It is the school's goal to protect students from preventable and infectious diseases. Any child with a temperature greater than 100.0 degrees will be sent home ill due to fever. A student who is home ill due to fever must have a temperature within normal range for 24 hours without use of Tylenol (acetaminophen) or Advil (ibuprofen) prior to returning to school. This is State of Delaware policy and Red Clay School District policy.
